BESTMIX

Discover the Value of your Spend

BESTMIX ERP Suite

The integration between BESTMIX ERP Suite and ISPnext provides a future-proof solution for organisations in the food and feed industries. With our certified Microsoft Dynamics 365 F&O connector, extended with a BESTMIX-specific add-on, financial and procurement data is exchanged seamlessly and in real time. This extension adds targeted functionality for invoices that include special weights, contracts and transport data. The result is improved operational efficiency, accuracy and compliance across your processes.

The benefits at a glance

Efficiency improvements

Automation of time-consuming tasks such as matching and invoice processing.

Fraud prevention

Tighter controls and reduced risk of incorrect payments.

Real-time insights

Always access up-to-date data for better decision-making.

Cost reduction

Lowers administrative burden through process optimisation.

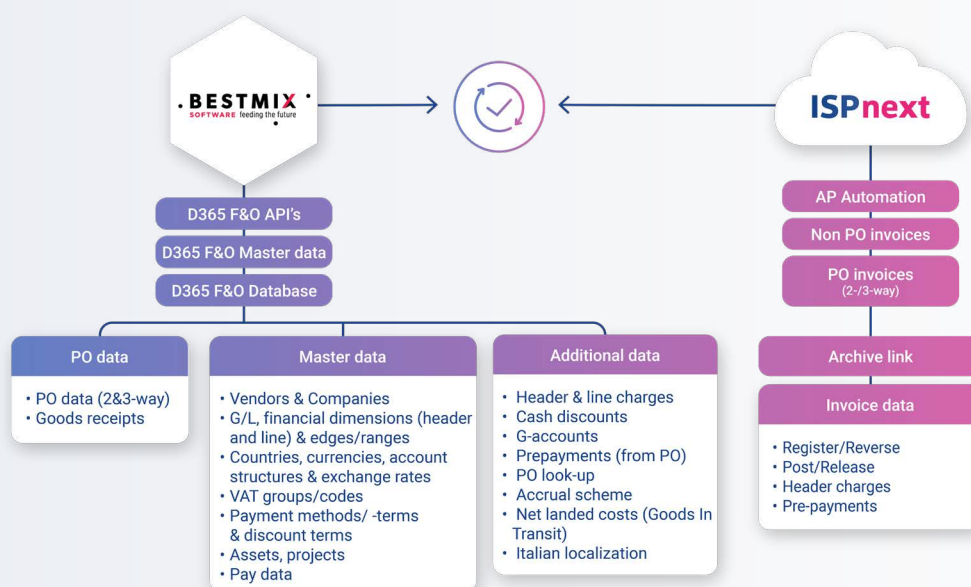

Real-time integration

Automatically synchronises master data, financial bookings, orders and receipts.

Unburdening

By automating processes, your team gains time to focus on strategic tasks.

Functionalities BESTMIX ERP Suite integration

1

Advanced data exchange via APIs

Our integration with the BESTMIX ERP Suite leverages APIs for precise, real-time data exchange. This ensures seamless synchronisation of key data, such as:

- **Master data:** Suppliers, entities, general ledger accounts, financial dimensions, and assets such as asset codes
- **PO data:** Processing of purchase orders with 2-way and 3-way matching, goods receipts, scheduling agreements and asset management

This integration enables organisations to centrally manage financial and operational data and access it with ease.

2

AP Automation

Our solution fully automates the invoice processing workflow. Both PO and non-PO invoices are handled digitally, minimising manual checks and increasing efficiency. Thanks to real-time integration, processes run faster with fewer errors.

- **Invoice data:** Features such as Register/Reverse and Post/Release help reduce lead times and error risk.

“Collaboration with BESTMIX ERP Suite accelerates complex invoice processing in the feed and food industries, saving time and enhancing process quality.”

- Cees van Ginkel, **Strategic Partnerships Manager** | ISPnext

3

Single Source of Truth (SSOT)

Automatic synchronisation of master data and invoice bookings ensures the ERP system remains the single source of truth. This supports consistent financial reporting and avoids errors, fraud and incorrect payments. Approvers work directly within ISPnext, avoiding the need for additional BESTMIX licences.

Conclusion

Integrating BESTMIX ERP Suite with ISPnext lays a solid foundation for controlled, efficient and insightful financial processes. Real-time data exchange, automated invoice processing and smart matching logic ensure you always have the right information at the right time. This supports decision-making and creates space for strategic growth.
