

Ultimo Connection

We offer a seamless plug-and-play integration with Ultimo. This intelligent integration ensures the digitization of the processing and matching of Ultimo orders with purchase invoices in ISPnext's AP Automation. This results in fast, efficient processing, cost savings, and continuous control over expenditures.

Functionality overview

Plug and play: Make asset management part of your procurement with ERP and invoices, enabling real-time transactions and efficient processes in ISPnext.

Safe and secure connection: No complicated ERP integrations are needed anymore with this pre-built connector

Prevent unauthorised expenses: By using the advanced workflow in ISPnext each Ultimo order goes through the correct approval process and prevents unauthorised expenses

Touchless matching of Ultimo purchase orders and invoices: Easily match Ultimo purchase orders and invoices to achieve an end-to-end solution with automatic invoice matching.

Scalable and Efficient: Benefit from multi-level and parallel approvals for purchase requisitions, along with quick access, overviews, and insights in AP Automation.

Ready to go with our standard | Ultimo connection
